N.º 38
JANUARY 2013

EDITORIAL

Dear Readers,

We ended 2012 in a positive tone despite the fact and challenges of a difficult year. In reality we have made a turnover the about 4, 6 million € euro, a little bite more than the previous year. The order level was higher about 7 million euro.

We had exports (mainly Macau, Angola & Qatar) for about 2, 2 million euro which means 50% of the total turnover.

This was only possible due to the confidence and loyalty of our customers and friends towards our company, as well as the diligence of our team to provide the best to our customers.

Thanks to everyone whom his contribute was important.

All the planning made in the beginning of the year 2012 was fulfilled and for us the most important was the team learning. All company employees received at least 35 hours of study.

We start 2013 growing in exports where we need to achieve a new record , so please help us to achieve that. In fact the internal market was been shrinking enough to bring us to other targets.

On the reverse side of this letter you will find the certificate of “Official integrator 2012/2013” from Weidmuller.

Best Regards
A.Pedrosa

Schneider
 **Electric**
Fabricante autorizado

WE CARE!!

For the PSC –Assembly – Power Switchgear and Control gear Assembly a new name of the electrical switchboard (Standard 61439-1) we use the best material and tools to have a higher level of quality in our panels.

To do that for the interface connections we use Weidmuller’s materials (Terminal blocks, wire connectors etc...) also the normal tools we use to produce the panels are also connected with the special ones: FACOM for some tools and Weidmuller for crimping tools (cutting, stripping and crimping) following the recommendations of our original manufacture Schneider Electric.

Is important for us that one of our main suppliers, Weidmuller has a Quality management system according to ISO 9001:2008 and the products are made in accordance with the environmental standard ISO 14001.
